United Nations Group of Experts on Geographical Names (UNGEEN)

In 1959, the Economic and Social Council (ECOSOC) paved the way for a small group of experts to meet and provide technical recommendations on standardizing geographical names at the national and international levels. This meeting gave rise to the United Nations Conferences on the Standardization of Geographical Names (UNCSGN) and to the United Nations Group of Experts on Geographical Names (UNGEEN). The UNCSGN is held every five years, and UNGEEN meets between the Conferences to follow up the implementation of resolutions adopted by the Conferences and to ensure continuity of activities between Conferences. Today, UNGEEN is one of the seven standing expert bodies of ECOSOC, with over 400 members from over 100 countries.

Outside its meetings, UNGEEN functions through 24 geographical/linguistic divisions and through working groups, currently addressing issues of training courses, digital data files and gazetteers, romanization systems, country names, terminology, publicity and funding, and toponymic guidelines.

more

A multilingual, multiscriptural and geo-referenced database of names for countries, capitals and major cities

Upcoming conferences and sessions

The 29th Session of the United Nations Group of Experts on Geographical Names (UNGEEN) will be held from 25 - 29 April 2016. Further details will be posted as they become available.

The 11th Conference on the Standardization of Geographical Names (UNCSGN) will be held in 2017. Further details will be posted as they become available.

Gazetteer of Australia Place Name Search

Place name:

Place Type:

State:

How to use the Place Name Search

Use this search to find the location of places in Australia.

Enter the first few letters of a place name and click the Submit Query button. To refine a search, either select the Place Type or State from the lists. To clear the information, click Reset.

If a search does not produce the desired result, the search criteria should be modified. For example, key in either Mt Isa, Mount Isa, Isa Mt or Isa. Omitting Mount or Mt should still produce the correct result.

Some locality names have alternate names. Alternate names are recorded in the variant name field of the Gazetteer. When a search result is returned the option to display additional information for the feature is available by the Record ID button. Selecting this button will display the full record information for the feature, this includes alternate name, map number and the latitude and longitude in decimal degrees. Homestead names from Geoscience Australia as the source are unofficial names.

How to download the data

The Gazetteer of Australia 2012 release is available for download from the [Free Data Downloads](#) page. The quickest way to locate the data is to type gazetteer in the keyword search.

The custodians of the data do not guarantee that the data is free from errors and omissions. If you have difficulties with this application, or identify possible errors or omissions in the data, please send an email to gazetteer@ga.gov.au.

About the Gazetteer

The *Gazetteer of Australia 2012* provides information on the location and spelling of more than 370,000 geographical names across Australia as at January 2012.

The supply of data is coordinated by the Intergovernmental Committee on Surveying and Mapping and derived from State, Territory and Australian Government agencies.

Copyright of the Gazetteer data resides with the relevant State, Territory and Australian Government agencies which are custodians of the data.

About Geographic Names

The Committee for Geographic Names in Australasia has developed an education resource package explaining how geographic names are assigned to places. The package includes a video titled 'What's in a Name', teacher resources for primary school students together with student exercises and links to other sites of interest.

Recherche de toponymes

Interrogez la Base de données toponymiques du Canada (BDTC) en saisissant le nom d'une ville, d'un village, d'un lac ou de toute autre entité géographique. Vous pouvez également spécifier le type d'entité ainsi que la province ou le territoire où se trouve le toponyme recherché afin de restreindre votre recherche.

Nom du lieu

Ce champ est insensible aux majuscules, les caractères accentués peuvent être saisis sans accent et l'utilisation de caractères de remplacement (*) est permise.

Type d'entité

- Lieux habités
- Régions administratives
- Entités d'eau
- Entités terrestres
- Entités glaciaires ou nivales
- Entités associées à la végétation
- Entités souterraines
- Entités volcaniques
- Entités anthropiques
- Entités sous-marines et maritimes

Toponymes du Canada

Toponymes canadiens

Qui sommes-nous et que faisons-nous?

Les noms d'endroits, également appelés « noms géographiques » ou « toponymes », sont les noms que nous utilisons pour faire référence aux endroits et aux entités géographiques qui nous entourent. Ils apparaissent sur les cartes et les panneaux routiers, et nous les utilisons chaque jour pour donner des indications et décrire l'endroit où nous nous trouvons. L'autorité toponymique du Canada se nomme la Commission de toponymie du Canada (CTC). Le Secrétariat de la CTC se trouve à Ressources naturelles Canada.

Chercher des toponymes canadiens

Les toponymes officiels du Canada sont stockés dans la Base de données toponymiques du Canada (BDTC). L'outil de recherche en ligne sur notre site Web offre de nombreuses façons de chercher un toponyme officiel, actuel ou ancien. Vous pouvez faire une recherche par nom ou par coordonnées géographiques. Vous pouvez également chercher un toponyme par identificateur unique, soit le code alphabétique de cinq lettres qui est lié au dossier d'un toponyme, ou par région rectangulaire. Vous pouvez également choisir un nom parmi une liste alphabétique de tous les toponymes disponibles.

Presentación

Los nombres geográficos se refieren a la información toponímica del país. La toponimia, es la disciplina mediante la cual se pueden nombrar, relacionar, ubicar y reconocer elementos geográficos representados en los mapas.

Existen nombres geográficos usuales, normalizados y oficializados, éstos son dinámicos como la vida misma, la sociedad los crea, los transforma, los evalúa, los adopta, los olvida y crea nombres nuevos, por lo cual es necesario mantener vigente su actualización.

GNS SURVEY

Your feedback is valued (Note: The survey is anonymous)

Putting a Name to a Place

The GEOnet Names Server (GNS) is the official repository of standard spellings of all foreign geographic names, sanctioned by the United States Board on Geographic Names (US BGN). The database also contains variant spellings (cross-references), which are useful for finding purposes, as well as non-Roman script spellings of many of these names. All the geographic features in the database contain information about location, administrative division, and quality. The database can be used for a variety of purposes, including establishing official spellings of foreign place names, cartography, GIS, GEOINT, and finding places.

GNS Search - Open Geospatial Consortium (OGC) Viewer Page
 Provides access to an OGC compliant Web Map Services (WMS) interface and high level graphical search. This page works best using Internet Explorer 7 or higher, although it will function properly with most modern browsers.

UNGEGN World Geographical Names

Multilingual, multiscriptual dataset of names of countries, capitals and major cities.

Geographical Names Database | [About](#) | [FAQ](#) | [Feedback](#) | [Contact](#)

Beta version

Select a country to zoom in and list the names below the map

Roll over a country to display the country name in the six UN languages. Point to a city to see the city endonyms (where available and in romanized form only) and the English name. Capital cities are shown in red, other cities are shown in green.

Note: Depending on the computer settings, some names might not be able to be displayed properly.

Notes:

- The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations. The source for the file is [UNGEGN](#). Final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined.
- The Arabic fonts are not connected at this stage because of technical problems.

Last update: 7 April 2014

Next scheduled update: 1 November 2014

Please send contributions to be included in the next scheduled update by: 23 June 2014

The screenshot shows the maplandia.com website interface. At the top, there is a search bar with the text "Google Custom Search" and a "Search" button. Below this, there are two search boxes: "world places:" and "world regions:", both with "search" buttons. A navigation bar contains tabs for "Africa", "Asia", "Australia", "Europe", "North America", and "South America". The main content area features a "Street Maps - Map" section with a right-pointing arrow and the text "Interactive Street View Map. Street Maps". Below this is a section titled "find your google map destination" with a "fulltext:" label and a character count "1 - 30 characters". A search input field contains the text "timgad", and a "search" button is positioned below it. The "search results" section shows a table with columns "place", "location", and "country". The results for "timgad" are: place: Timgad, location: Batna, country: Algeria (with a small Algerian flag icon). Below the table, it says "search results for timgad".

Survey of names of ruins: Nona.net

The screenshot shows the nona.net website interface. At the top, there's a search bar with the text 'place name' and a 'SEARCH' button. Below the search bar, the results for 'Timgad (Batna, Algeria)' are displayed. The main content area features a map of the region around Timgad, with a central marker for 'TINGAD'. To the right of the map, there's a sidebar with several sections: 'Where is Timgad?' with a map of North Africa, 'Elevation and coordinates' (Latitude: 35°28'21"N, Longitude: 6°28'4"E, Elevation: 1038m), 'related resources' including 'Visiting Timgad?' and 'Hotel/Accommodation', 'Travel Guide', 'rental cars', and 'GPS waypoint'. At the bottom, there's a section for 'Places with similar names to Timgad, Algeria' listing locations like Timket (MA), Dumagat (PH), and Timbukto (US). A blue banner on the left side of the page reads 'Telenk DevCraft Bundle Build NET & HTML5 Apps 2x Faster Download Free 30-Day'.
